

Dr. Tal David Honored With Vitals Patients' Choice 5-Year Award

San Diego, CA May 16, 2017 - A select few of physicians were honored with the prestigious Vitals Patients' Choice 5-Year Award, and this year includes Dr. Tal David.

Only doctors who have received consistent top ratings and reviews by their patients are awarded the Patients' Choice 5-Year Award. With over 8 million ratings and reviews, Vitals has the largest collection of crowd-sourced data on doctors online.

While other quality metrics are important to consider, patient ratings and reviews help identify doctors committed to providing skilled and compassionate care. Those are qualities that can't be overlooked: a strong doctor-patient relationship leads to better compliance with care regimes which impacts patient health.

"Overall, we know people are looking for doctors that listen to them and give them a say in decisions about their own health," said Mitch Rothschild, Founder and Executive Chairman of Vitals. "Thanks to the millions of people in the Vitals community, it's easier to recognize the doctors who are doing good by doing well by their patients."

Vitals Patients' Choice winners are chosen based on the number and overall rating a doctor receives from patients for the past 5 calendar years. The algorithm also takes into account other quality metrics that the provider must meet.

About Vitals

Vitals empowers everyone to shop for their health care like an expert. We bring together cost and quality transparency along with innovative consumer engagement programs to help people select high-quality, lower-cost care. Vitals leads the market with incentive and engagement programs that pay people to shop. Our solutions achieve measurable and sustainable savings for consumers, employers and health plans. Vitals helps more than 120 million people each year access better, more affordable care.
